

## ODEN SAAS<sup>TM</sup>

### FOR ORGANISATIONS WHO:

- ◆ Need to conduct moderate to high levels of assessment.
- ◆ Don't want the hassle of learning expert software.
- ◆ Want a system generalist staff can use.
- ◆ Have tight project schedules.
- ◆ Need to carry out multiple iterations for projects.

### WHAT IS IT?

- ◆ An easy-to-use web-application subscription service providing noise assessment capability.
- ◆ Users create project and scenarios for area of interest by "clipping" model base data from a global map, edit it and run a variety of models to obtain a variety of results.
- ◆ Supports road, rail and industrial noise sources.
- ◆ Suitable for modelling dense urban environment
- ◆ Base data preconfigured to save time.
- ◆ Fast turn-around-time.
- ◆ Highly responsive when design options change.
- ◆ Models roads, railways, industrial sources, buildings, barriers, ground types, terrain and more.
- ◆ Produces receptor point, assessment grid, rotating facade and vertical sections calculations.
- ◆ Report ready map production.
- ◆ Import via DXF, SHP and TNMSDX.
- ◆ Result export to Excel, CSV, SHP & TNMSDX

### HOW IT WORKS?

- ◆ On-demand subscription purchased (fixed duration or tailored).
- ◆ Users attend training workshop.
- ◆ Access to service granted. Users log in and conduct assessment.
- ◆ Create project and scenarios for area of interest.
- ◆ Telephone & email support provided.

## ODEN SAAS<sup>TM</sup> SUBSCRIPTION SERVICE

ODEN SaaS<sup>TM</sup> is an easy-to-use subscription service providing organisations with a noise assessment capability via the web.

After purchasing a time based or custom subscription, registered users can access the system, create projects from the prebuilt base data, add, edit and manipulate model data and then run a variety of model types and assessments.

Outputs from the assessments can be viewed interactively in 2D and 3D or exported as maps and tables.

## ODEN SaaS™ FAMILIARISATION WORKSHOP

Objective:	To equip participants or potential ODEN SaaS™ subscribers with hands-on experience to undertake a typical noise assessment workflow using the ODEN SaaS™ service.
Intended Participants:	<ol style="list-style-type: none"> <li>1) Anyone who may have an interest in understanding more about the ODEN approach and technology.</li> <li>2) Potential ODEN SaaS™ subscribers who may prefer to trial the service prior to formal subscription.</li> <li>3) Subscribed ODEN SaaS™ users as part of the service offering or as a refresher.</li> </ol>
Format:	Technical illustration by speaker/instructor, hands-on tutorial practice with assistance from the speaker/instructor and helper(s) and Q&A.
Duration:	2~3 hours.
Class Size:	From 10 to 30 persons.
Material:	Notes (in PDF format) will be provided via email after workshop.
Equipment:	<p>For participants who want to carry out hands-on practice during the workshop, please bring along a notebook computer with at least the following minimum specification:</p> <ul style="list-style-type: none"> <li>◆ Intel Core 2 Duo 2.4GHz CPU with 2GB RAM</li> <li>◆ 10GB free/usable disk spaces</li> <li>◆ WiFi capability</li> <li>◆ DirectX 9.0c and OpenGL 2.0 compliant graphics card with 512MB video memory</li> <li>◆ 1024 x 768 @ 32bit screen resolution display or better</li> <li>◆ Microsoft Windows XP, Windows 7, Windows 8 (Both 32-bit and 64-bit)</li> <li>◆ Microsoft Internet Explorer 8, FireFox 3.5 or above or Chrome 10 or above version</li> </ul>
Workshop Content / Outline:	<ul style="list-style-type: none"> <li>◆ Brief overview of ODEN user interface, operation and capabilities</li> <li>◆ How to prepare a computer to run ODEN and test for ODEN readiness</li> <li>◆ Create a project/scenario</li> <li>◆ Run calculation</li> <li>◆ Add and edit model objects</li> <li>◆ Review and see results</li> <li>◆ Hands-on practice by participants plus Q&amp;A</li> </ul>
